LUXORliving Smart Home System
Simply simpler
Simply flexible

Building Automation since 1921

LUXORliving Smart Home:
controls your building
simple and safe

LUXORliving is the future-proof smart home system from Theben. Perfect for new builds and retrofitting. By cable, expandable by radio or completely wireless. Lights on, lights off. Dimming. Control heating. Control blinds. Scenes. Via voice control, app and button. Just simple. Just safe. An investment for life - thanks to an open communication standard (KNX).

#01
Easy for everyone

LUXORliving is very easy to use. Smart via the LUXORplay app, voice control or by pressing a conventional button. **Page 4-5**

#02 Simply more comfortable

Lighting design, control of shading and room climate - your home becomes more comfortable with LUXORliving. **Page 4-5**

#03
Simply open

LUXORliving offers many solutions for your smart home system. Other technologies and services can also be seamlessly integrated. **Page 6-7**

#05
Simply sleek

Visible LUXORliving components blend into any interior design thanks to their stylish design. **Page 12-13**

#04
Simply safe

LUXORliving ensures a secure home with features such as presence simulation or the central off function. LUXORliving is also well protected against hacker attacks. **Page 8-11**

#06
Simply flexible

LUXORliving is open for flexible extensions to your smart home system. Regardless of whether it is a new build, an extension or a renovation. **Page 14-15**

Shading as if by itself

LUXORliving conveniently controls blinds, shutters and awnings according to your requirements via the LUXORplay app or controls the shading automatically.

Room temperature made to measure

What if the room temperature in your home could automatically adjust to your needs?

Practical:

With a scene for shutters, for example, you can easily lower the shutters in the evening with one click via the LUXORplay app and the light comes on - dimmed if desired.

Customised:

LUXORliving ensures that your bathroom is already warm in the morning. The children's room is the perfect temperature when they come home from school. And the study is pleasantly cool.

LUXORliving smart home system
Simple for everyone
Simply more comfortable

Smart home system — that sounds like complicated programming and time-consuming training in all functions. This is not true for LUXORliving. LUXORliving is the smart home system that explains itself. It's easy to use and it's simple to try out all the functions.

Voice control
LUXORliving can be controlled via the Amazon voice assistant Alexa or via Google Assistant and the Google Home app. This means that functions at home can be conveniently controlled by voice. ↓

↑ **LUXORplay for operation**
LUXORplay is the app for convenient, safe and simple operation of LUXORliving via smartphone or tablet (for Android, iOS and Windows).

↑ **Push-buttons and room controllers**
No smartphone to hand? LUXORliving iON push-button sensors and room controllers allow you to trigger various functions at the touch of a button.

Feel-good ambience in the right light
With LUXORliving, different colours and colour temperatures can be set and dimmed in different rooms, e.g. for a bedtime story in the children's room or to concentrate on work in the office.

Better safe than sorry LUXORliving is VDE-certified

VDE 04/2021 Smart Home Information security tested Luxorliving Gateway IP1 www.VDEinfo.com ID. 40048825 Tested by VDE Germany

VDE 08/2021 Smart Home Information security tested Luxorliving Backend www.VDEinfo.com ID. 40051210 Tested by VDE Germany

VDE-certified and tested for Smart Home information security:
→ LUXORliving IP1 system control center
→ iOS and Android app LUXORplay
→ Remote access via Theben Cloud
→ Cloud server in Germany

Safe is safe With the Theben Cloud, you are safe thanks to the certified server location in Germany. Your LUXORliving smart home system is thus optimally protected against data theft and manipulation.

Pleasant:
Time-dependent dimming is also possible without any problems. Limit the maximum brightness during the night so that you are not dazzled when you switch it on in the dark.

Simply open
for everything
Technologies and services

LUXORliving is open for flexible extensions to your smart home system, and not just thanks to KNX technology. Other technologies and services can also be seamlessly integrated. There are virtually no limits to your imagination, so let yourself be inspired by a few examples.

Smart Home?
Simply safe
and reassuring

Security and safety for the whole family is what most people associate with their home. It is disturbed if a break-in permanently impairs this feeling.

Everything off. Perhaps the cleverest function.

You know the situation: the car is packed, the family is waiting and you go through the whole house again to check everything. That is now history. With LUXORliving you simply press "Central OFF" – and everything is off.

Safety in an emergency. Integration of smoke and CO detectors.

A house fire or an uncontrolled carbon monoxide leak can be fatal. The integration of smoke and carbon monoxide alarms in LUXORliving is therefore particularly recommended. The underlying mesh wireless network warns residents quickly and reliably about smoke and carbon monoxide and allows them to get to safety in time.

Always there for you. Presence simulation with LUXORliving.

Sometimes you just have to leave everything behind and close the doors behind you. It's nice when everything continues to run smoothly. Just as you are used to. LUXORliving's presence simulation ensures that the lights come on and the blinds are lowered at the usual time every evening. After all, not everyone needs to know that you are not at home.

That keeps the uninvited away. Don't panic with LUXORliving.

It's good to know that everyone is safe and sound at home. LUXORliving's panic function contributes significantly to this feeling of security. At the slightest disturbance, at inexplicable noises in front of, next to or behind the house, a command simultaneously triggers the activation of the house lights and blinds. This drives away anyone who has no business being there.
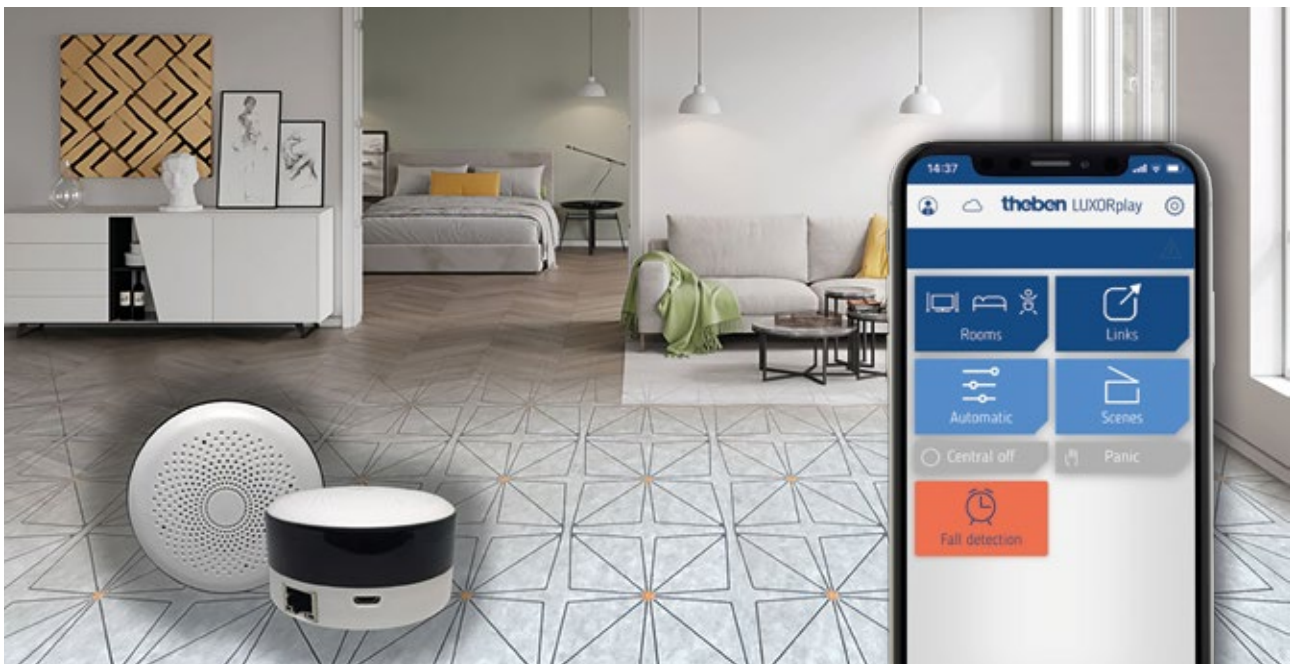

Ambient Assisted Living
Better quality of life
today and tomorrow

Smart home functions offer enormous advantages in terms of living comfort and security. This added convenience and safety today also provides valuable support for the future. Many people find themselves in a situation where they can no longer cope with everyday life without assistance due to age or a disability.

LUXORliving offers many solutions to enable a self-determined life in your own At home.

→ Switch lights automatically via a motion detector

→ Dim lights automatically

→ Control heating and blinds from anywhere

→ Centrally switch off loads

→ Fall detection with SensFloor assistance system

→ Use home emergency call via voice control

LUXORliving
Simply chic
for every room

The wall-mounted **motion detector** can be placed discreetly on any wall thanks to its particularly flat, attractive design and blends harmoniously into any room design.

LUXORliving BI360 the versatile motion detector

The LUXORliving BI360 offers an elegant, compact design and many other advantages: The **motion detectors** are not only suitable for simple surface mounting, but also for quick ceiling or flush-mounted installation and thus fit into any room design.

The elegant **touch sensors** with 2 or 4 buttons and status LEDs or the **room controller** with 10 functions and LC display look good in any room.

Unobtrusive appearance with striking functions

The **weather station** made of semi-transparent plastic, which blends into the facade and only becomes visible upon closer inspection, offers a successful fusion of form and function. The weather station lowers the blinds in direct sunlight, for example, thus reducing the risk of overheating in the rooms. Or puts the blinds in a safe position in strong winds. If it starts to rain, sensitive textile awnings are automatically retracted. If desired, the weather station can also automatically open the blinds at dawn or close them at dusk.

Simply flexible
in use
and function

The simple smart home system for new builds LUXORliving is wired in the same way as any other KNX installation. The individual systems such as lighting, heating, ventilation and blinds are intelligently networked with each other and commissioned quickly and easily using LUXORplug software. It can be conveniently controlled by voice via Amazon Alexa, Google Assistant or ProKNX Aragon, via the free LUXORplay app or by push-button.

Connection of all components to control the system

Control centre with LAN connection

Tablet or mobile phone for operation

Access via the in-house network

Always and everywhere there for you
All LUXORliving functions can be controlled and statuses monitored remotely via the Theben Cloud using the LUXORplay app.

Simply flexible
in retrofitting
and renovation

Smart home retrofitting made easy
With the growing demands for sustainable building the importance of refurbishment and retrofitting is also growing of existing buildings.But how can apartments, single and multi-family homes, doctors' surgeries, shops or offices be retrofitted with KNX-based smart home functions if no KNX installation is available? And with as little effort as possible?

LUXORliving Smart Start makes it possible!
LUXORliving Smart Start is the complete radio-based solution for the Smart Home with all the functions you need today and in the future. This is how simple and future-proof the entry into the smart home can be.

Simply flexible
in an extension
during expansion

Expansion stage for wired systems Do you want to extend your home with a wired LUXORliving system to include an extension or conservatory and equip it with smart functions? No problem: with LUXORliving, existing wired installations can be quickly and easily extended with KNX wireless actuators - without additional wiring and with all the usual functions.

Connection of all components to control the system
